

Dear valued customer,

## Do you need better performance from your rotary double-shoulder connection?

**Choose VAM Express™ (VX) to guarantee:**

- Superior performance in complex offshore and onshore drilling environments like extended reach and horizontal wells or shales;
- Average 1½-2 times BETTER torque than API;
- Easy stabbing and running with up to 16% trip time savings compared to other competitor double-shoulder connections;
- User friendliness;
- Reduced stabbing damage and extended drill-string life;
- Optimized OD/ID for improved hydraulic performance.

**Get the facts at the IADC SPE Conference in Amsterdam (Netherlands) booth #228.**

**Our Technical Experts will be giving product presentations and answering all of your questions:**

*We look forward to seeing you!
